High Flex 600 Volt
Single Conductor Power Supply Cable
UL AWM / MTW and CSA AWM

Auto-Flex™ 360 is designed and engineered for flexibility and ease of installation for welding robots.

Auto-Flex™ 360 uses a unique copper construction, along with a reduced diameter, to become the ideal flexible cable for a transgun dress-out. And, Auto-Flex™ 360 is a cost effective alternative to the costly, more traditional transgun welding cables.
